

Nature's Way Ambush AB

FOAM CONCENTRATE FOR CLASS A & B FIRES

A dual purpose foam formulated for maximum class A & B fire knock-down.

Nature's Way Ambush AB is a concentrated blend of premium, non-toxic, biodegradable surfactants and natural microbes. It is designed for fast knock down and extinguishment of both Class A and Class B fires with firefighter safety and the environment in mind. Unique formulation of Ambush AB incorporates the essential characteristics of two separate products, creating an effective dual-purpose concentrate. This high performance blend delivers an optimum balance of consistency, heat resistance, vapor suppression, water penetration, retention, and drainage.

Ambush AB extinguishes flammable/combustible liquids by controlling the release of flammable vapors and cooling sources of ignition in deep-seated fires. Enhances the ability of water to penetrate deep into common combustibles, Ambush AB provides fast knock down and resistance to rekindling. Ambush AB provides a stable, long lasting foam blanket on flammable liquids that immediately "heals" itself if disturbed.

- Dual purpose, effective on both Class A and Class B fires
- Fast knock down/extinguishment using much less water
- Rekindle resistant, increases penetration and cooling
- Stable foam blanket suppresses vapors, burnback
- Non-corrosive, 100% biodegradable, environmentally safe
- Patented microbial formula
- Economical, priced lower than other premium concentrates
- Effective, extensively tested with proven results
- Highest quality, designed to meet the strictest standards
