February 20, 1996

To whom it may concern,

We have used Natures' Way products with microbes to remove and bioremediate oily wastes from concrete and rocks for about three years. For the last several months we have also used their aqueous based parts cleaning fluid with microbes in our parts washing machine in the maintenance shop. The products have proven to be safe for use by our employees and they are quite pleased with the performance.

We have also noticed that rinsing the products into drains has helped reduce grease build-up in the sewer system and separator, and has not caused any increase of oil and grease in the discharge stream to the bayou.

Sincerely,

Dick Dusenbury
Technical Supervisor
Houston Lighting and Power Company
