

Nature's Way
PowerClean
INDUSTRIAL

MULTI-PURPOSE CLEANER DEGREASER

with select, natural, oil-consuming microbes

An alternative cleaner/degreaser that's sensibly priced and actually works.

Maintaining a clean facility projects a "we care" attitude and creates a safer work environment. Unfortunately, cleaning can also create health, safety, and environmental problems. Even popular "green" cleaners, while biodegradable, do nothing to change the toxicity level of the removed contaminants in the discharge water. And, while most cleaners do a good job removing surface oil and dirt, they do nothing to remove trapped sub-surface oils that cause **slippery conditions** and **unsightly stains**.

Nature's Way PowerClean solves these problems naturally while cleaning. Not only an excellent biodegradable pH neutral cleaner, it also contains select "oil-consuming" microbes, the same kind used to eliminate oil spills offshore. The result of ten years of exhaustive research, including a thorough studies at leading oil company research centers. PowerClean is the product of choice for many corporations throughout the country including fast oil change shops, fueling stations, auto dealerships, machine shops, and anywhere unwanted oil and grease exists.

- Excellent "all in one" cleaner and degreaser
- Biodegradable: Non-toxic to people, wildlife, and vegetation
- Eliminates sheens on contact, sharply reduces or eliminates VOC's
- Reduces or eliminates generated wastes and liabilities
- Biologically eliminates or reduces oil stains, restores property
- Reduces slippery conditions, even when wet
- Safe to use and handle, non-irritating to skin or lungs
- Cleans and eliminates food and human wastes and odors
- Certified for use in California by the SCAQMD
- *U.S. EPA listed as a surface washing agent

Restores and protects unsealed concrete floors

- **"Microbes become embedded in concrete pores, "feeding" on trapped oils.** With regular use, concrete becomes a "house" for microbes to live. As oils are consumed, water is able to penetrate into the concrete rather than "pool" on the surface, greatly reducing slippery conditions, especially when wet.
- **The longer you use it, the easier cleaning gets.** Embedded microbes consume much of the oil that would normally have to be mopped up and form a natural barrier against freshly spilled oils, resulting in less labor, less product usage, and less disposal.

Cleans all type floors, fabrics, tools, equipment, etc. while reducing disposal concerns and costs

- **Doesn't allow oil and dirt to stick together.** PowerClean is a "wetting agent", forcing oil to separate from dirt while cleaning, reducing sludge build-up in separators and keeping mop heads and brooms clean (reducing friction, the major cause of wear).
- **Breaks down oil into "bite-size" particles for microbes.** Bioremediation, normally a slow process, is greatly accelerated due to PowerClean's patented surfactant blend.
- **Components of oil such as benzene are microbes "favorite food".** Harmful water-soluble hydrocarbons are carried with rinse water into drains and through separators. Aside from containment, PowerClean offers the best and most affordable defense yet against costly environmental liabilities due to spills, i.e. contaminated effluent / property.
- **Affordable.** You might expect a concentrated, high performance "green" cleaner with so many advantages to be priced substantially higher than conventional cleaners, but surprisingly, PowerClean is priced to be competitive with cleaners offering far less.

PHYSICAL FORM

Liquid - Pale green, pleasant scent

PACKAGING

55 gallon plastic drums (208 L.)

5 gallon plastic pails (19.93 L.)

Bulk (275 gallon containers or larger)

AREAS FOR USE

Cleaning most floor types, including rubberized, composite, tile, concrete, asphalt, painted or unpainted metal and tools. Biological treatment of unwanted wastes in effluent and surrounding area. Other areas include spraying around dumpsters and oil collection tanks.

TEMPERATURE LIMITS

32 deg F to 120 deg F

SAFETY

Wet Flammability - nonflammable

Dry Flame Spread - N/A

Threshold Limit Value - Non-Toxic

Medical - Refer to MSDS

pH - approx. 8.9

COVERAGE

Concentrated. Dilution rates vary according to application.

TOOLS FOR APPLICATION

Manual or automatic sprayers, pressure washers, mops, floor scrubbers proportioning dispensers

LIMITATIONS

Any chemical or condition that will destroy live microbes will limit bioremediation. Do not mix with conventional cleaners.

WEIGHT

8.33 lbs./liquid gallon (1kg/L)

DOT SHIPPING LABEL

None required

APPLICABLE TEST REQUIREMENTS

As required by governing authority.

*PowerClean is listed on the U.S. Environmental Protection Agency's NCP Product Schedule. This listing does not mean that EPA approves, recommends, licenses, certifies, or authorizes the use of PowerClean on an oil discharge. This listing means only that data has been submitted to the EPA as required by subpart J of the National Contingency Plan, S. 300.915

The Nature's Way Line of Bioremediation Products are covered by U.S. Patent number 5,561,059

ALL INGREDIENTS ARE COMPLETELY BIODEGRADABLE
