

# PowerClean RTU

Ready-to-Use Industrial Cleaner with Microbes

## Instructions

*This cleaner contains live, safe, natural, "oil-consuming" microbes!*

- DO NOT USE WITH **HOT** WATER IF MICROBIAL BENEFITS ARE DESIRED
- DO NOT MIX WITH OTHER CLEANERS OR APPLY OTHER CLEANERS TO TREATED SURFACES
- BE SURE ALL MOPS, BUCKETS, EQUIPMENT, PUMPS, HOSES, ETC. ARE RINSED AND CLEAN

**ABOUT THE MICROBES AND PRODUCT:** Microbes will consume oils, lubricants, and transmission fluid BUT - only after being broken down (dissolved) and diluted in plenty of water \* Microbes won't clean floors by themselves – as with any cleaner, it still takes good old fashioned elbow grease \* Microbes do not "crawl"- they are transported by water \* Microbes used are non-pathogenic; safe to handle. The PowerClean formulation is non-corrosive and can be used to safely clean **concrete, asphalt, painted or unpainted metal, tile, wood, fabric**, etc. Will not harm rubber, plastics, or paint in proper dilution. PowerClean is listed by the U.S.EPA on the NCP Schedule\* as a surface washing agent for emergency spills.

### USE TO CLEAN:

FLOORS	DECKS	WALLS	BILGES	LOADING RAMPS
VEHICLES				
WALKWAYS	EQUIPMENT	TOOLS	MACHINERY	TANKS
QUARTERS				ANIMAL

### APPLICATION:

PowerClean RTU is ready to be applied directly from container for medium to heavy duty cleaning (concrete, machinery, equipment, etc.). For light duty cleaning (indoor floors, vehicles, etc.), RTU may be diluted with cool water as desired for best results and maximum economy. RTU can be used to clean all washable surfaces. RTU can also be applied to soil as a bioremediation agent or added to drains/ septic systems as a bio-treatment to reduce grease build-up and odors.

**NOTE:** OIL STAINS IN CONCRETE OR SOIL WILL NOT DISSIPATE OVERNIGHT in most cases. A thorough cleaning, followed by re-application, routine watering, and some patience will be required to eliminate deeply embedded oils. Shallow oils will be eliminated first, creating a distinct outline of deeper oil.

**APPLICATION METHODS:** Apply using pump-up sprayers or pumps, induction through pressure washers, in mop buckets, automatic floor scrubbing machines, chemical proportioners, or pouring manually. Will not harm gaskets, seals; pump or equipment internals.

**Note:** For difficult to remove compounds, we recommend concentrated PowerClean, MultiClean (high pH) or Nature's Way K-Gold, a non-petroleum, organic solvent degreaser. For more information and recommendations call your local distributor, or call Integra at 713-680-1234.

\*PowerClean is on the U.S. Environmental Protection Agency's NCP Product Schedule. This listing does not mean that EPA approves, recommends, licenses, certifies, or authorizes the use of PowerClean on an oil discharge. This listing means only that data has been submitted to the EPA as required by subpart J of the National Contingency Plan, S. 300.915

**WARRANTY:** Nature's Way products are manufactured in accordance with strict quality standards, however, due to the many variable and site specific conditions and requirements involved with application and the bioremediation process and the inability of Integra Environmental, Ltd. to control such conditions, all implied warranties, including, but not limited to, implied warranties or merchantability and fitness for a particular purpose are hereby disclaimed.

ALL INGREDIENTS ARE COMPLETELY BIODEGRADABLE
