October 2, 2006

Dear Frank:

I am writing to let you know that as a ServiceMaster Franchise for twenty years I always appreciate new and better ways of getting the tough jobs done. As such, finding you has been a tremendous help for our company, especially in the area of Eco Friendly products that actually deliver what they promise.

I am specifically speaking about your petroleum enzyme clean up product called Power Clean and your No Odor Enzyme line of deodorizer. Both of these are easy to use when you follow the directions and work very nicely for us here at ServiceMaster of Greater Bridgeport.

I have been calling you for 5 or 6 years now and cannot think of a single instance where we have failed when we have used Power Clean for our oil clean ups, and your No-Odor cleaner not only covers over the problem but actually digests the source of the odor and converts it to a harmless by product that is easily removed.

Thank you for being an important part of our R&D department. We look forward to using more of your environmentally friendly products as you continue to invent them. In fact I will volunteer our company to be a "guinea pig" should you need one for your new lines.

Sincerely,

Paul Plouffe
President CEO
