

SoilClean

Surface Soil Restorer

Instructions

PRODUCT DESCRIPTION: SoilClean is an aqueous, ready to apply blend of emulsifiers, surfactants, and naturally occurring microbes, specially adapted for consuming petroleum and other organic hydrocarbon contaminants such as gasoline, diesel, oil, hydraulic fluid, lubricants. It is 100% biodegradable, has no VOC's, and safe for use around people, animals, and vegetation. **Not intended for use on chlorinated hydrocarbons or in soil over 4" deep.**

APPLICATIONS FOR USE: SoilClean is to be applied full strength directly to surfaces using garden type pump-up sprayers, automatic sprayers or pumps, or by simply pouring manually. SoilClean is designed to eliminate shallow areas of contamination (less than 4" deep) in soil, grass, gravel, and other permeable surfaces. It can also be used as a light duty cleaner for removing oil films and dirt from concrete, drums, or equipment, or for eliminating oil sheens on water. Excellent for equipment storage areas, fueling stations, sampling points, etc.

BE SURE THE AREA IS SUITABLE FOR APPLICATION

1. Eliminate source of contamination if possible (repair leaks, install oil catch pans, etc.).
2. Remove all clay absorbent material. For best results in areas covered in standing oil, apply a generous amount of organic peat and mix in with the soil beneath. Absorbent pads or clay can be used to soak up oil, however, unlike use of peat, they must be removed prior to application of SoilClean.
3. For best results on hard packed surfaces, use hoe or rake to loosen to the depth of contamination.

APPLY

NOTE: Apply when soil is dry. Do not use sprayers/containers used for application of insecticides or pesticides. Oil soaked clay type absorbent cannot be treated successfully and must be removed to expose soil beneath.

1. **Spray or pour liberally over affected area, concentrating on worst spots. Apply one gallon per 75 to 100 sq. ft., depending on severity of contamination.**
2. **For best results, wet the area with cool water afterwards. Avoid run-off.**

FOLLOW UP

1. **It is necessary to re-apply SoilClean periodically to insure complete elimination and restore appearance. It is best to establish a "once per week" spraying program, re-applying product to problem areas on a weekly basis.**
2. **Continue applications until desired results are obtained. If no rain occurs, water the areas occasionally.**

WARRANTY: Nature's Way products are manufactured in accordance with strict quality standards, however due to the many variable and site specific conditions and requirements involved with the bioremediation process, and the inability of Integra Environmental, Ltd. to control these specific conditions, this product is sold "as is", "where is", with no warranties, express or implied, with respect to this product or the performance thereof. All implied warranties, including, but not limited to, implied warranties of merchantability and fitness for a particular purpose are hereby disclaimed.

The Nature's Way Line of Products is covered by U.S. Patent number 5,561,059

ALL INGREDIENTS ARE COMPLETELY BIODEGRADABLE
