

Nature's Way

PowerClean ULTRA

10X SUPER CONCENTRATED INDUSTRIAL CLEANER *And select, natural, oil-consuming Microbe Liquid*

**MAKES
UP TO 630
GALLONS OF
READY TO USE
CLEANER**

Highly Concentrated Cleaner Degreaser yields huge savings.

Without a doubt the most economical and earth friendly way to have the same great benefits as regular PowerClean Concentrate is to use Ultra PowerClean Super Concentrate. Being 10 times more concentrated makes it much less costly to produce, package and ship. These savings are then passed on to you, the customer. The same features also make it a "greener" product because there is less fuel being consumed when shipping a smaller and lighter product which also equates to less carbon monoxide. There is less plastic waste in landfills because a 1 gallon jug is now equivalent to 2 five gallon pails.

All of this and you still get an excellent biodegradable pH neutral cleaner along with a bottle of select "oil-consuming" microbe liquid to add to your ready to use cleaner. Ultra PowerClean is the product of choice for many corporations throughout the country including fast oil change shops, fueling stations, auto dealerships, machine shops, and anywhere unwanted oil and grease exists.

- **10X more concentrated than regular PowerClean**
- **Makes up to 630 gallons of ready to use cleaner**
- **Huge savings passed on to you the customer**
- **Biodegradable: Non-toxic to people, wildlife, and vegetation**
- **Eliminates sheens on contact, reduces or eliminates VOC's**
- **Reduces or eliminates generated wastes and liabilities**
- **Biologically eliminates or reduces oil stains**
- **Reduces slippery conditions, even when wet**
- **Safe to use and handle, non-irritating to skin or lungs**
- **Cleans and eliminates food and human wastes and odors**

Easy to operate Pro-Blend bottle proportioner measures the desired amount of concentrate by squeezing the bottle to fill to the exact amount needed. Then just open the lid and pour. Free with first time purchase of PowerClean Ultra.

Super Concentrated formula equates to big customer savings.

For routine cleaning, maintenance and restoring surfaces.

Microbes become embedded in concrete pores, "feeding" on trapped oils. With regular use, concrete becomes a "house" for microbes to live. As oils are consumed, water is able to penetrate into the concrete rather than "pool"

- on the surface, greatly reducing slippery conditions, especially when wet.

The longer you use it, the easier cleaning gets. Embedded microbes consume much of the oil that would normally have to be mopped up and form a natural barrier against freshly spilled oils, resulting in less labor, less product usage, and less disposal.

Innovative physical characteristics make Ultra PowerClean the safest and best choice for cleaning while reducing disposal concerns and cost.

Doesn't allow oil and dirt to stick together. Ultra PowerClean is a "wetting agent", forcing oil to separate from dirt while cleaning, reducing sludge build-up in separators and keeping mop heads and brooms clean (reducing friction, the major cause of wear).

- **Breaks down oil into "bite-size" particles for microbes.** Bioremediation, normally a slow process, is greatly accelerated due to PowerClean's patented surfactant blend.

Components of oil such as benzene are microbes "favorite food". Harmful water-soluble hydrocarbons are carried with rinse water into drains and through separators. Aside from containment, Ultra PowerClean offers the best and most affordable defense yet against costly environmental liabilities due to spills, i.e. contaminated effluent / property.

Affordable. You might expect a super **concentrated**, high performance "green" cleaner with so many advantages to be priced substantially higher than conventional cleaners, but surprisingly, Ultra PowerClean is priced to be

PHYSICAL FORM

Ultra PowerClean-Liquid - Clear, virtually no scent
Microbe Liquid-Clear, no scent

PACKAGING

Ultra PowerClean

- 1 gallon plastic jugs (3.78 L.)
- 5 gallon plastic pails (19.93 L.)
- 55 gallon plastic drums (208 L.)
- Bulk (275 gallon containers or larger)

Microbe Liquid

- 16 oz. plastic container
- 64 oz. plastic container

AREAS FOR USE

Cleaning most floor types, including rubberized, composite, tile, concrete, asphalt, painted or unpainted metal and tools. Biological treatment of unwanted wastes in effluent and surrounding area. Other areas include spraying around dumpsters and oil collection tanks.

TEMPERATURE LIMITS

32 deg F to 120 deg F

COVERAGE

Concentrated. Dilution rates vary according to application.

TOOLS FOR APPLICATION

Manual or automatic sprayers, pressure washers, mops, automatic scrubbers proportioning dispensers

LIMITATIONS

Any chemical or condition that will destroy live microbes will limit bioremediation. Do not mix with conventional cleaners.

WEIGHT

8.33 lbs./liquid gallon (1kg/L)

DOT SHIPPING LABEL

None required

APPLICABLE TEST REQUIREMENTS

As required by governing authority.
