To Whom It May Concern:
RE: Recommendation for MarineClean

As Service Manager of Dover Marine I have had many opportunities to try products that promise to reduce the amount of hazardous waste generated when cleaning engines. One by one, the products failed to live up to my expectations. When I was approached about using MarineClean, I was skeptical at best. I decided to try it because I had nothing to lose if it too failed.

We added MarineClean to the test tank and ran a 9.9 horsepower engine; within 30 seconds the water had cleared and the texture was that of tap water, there was no oily residue. We also realized another benefit of using MarineClean in the tanks; it is no longer necessary to clean off the motors after removing them from the tank because there is no oily residue on them.

MarineClean was the solution to our problem and allowed us to work more efficiently and cleanly. As we all know, it is very expensive to dispose of this wastewater correctly and MarineClean has eliminated these costs. I would recommend this product for anyone in our business. MarineClean is useful not only in test tanks but also for the cleaning and disposing of water from bilges. Additional uses are in eliminating oil and fuel as a result of spills, whether it is on the water or on the shop floor. MarineClean is a versatile product with an extensive application range. If you would like to know more about my experience with this product please feel free to contact me, or any one of my staff. I know that this product will be as beneficial to you as it is for me. I have been a satisfied customer since October 2002 and I know that we will continue to use MarineClean in our many applications.

Sincerely,

Gary Merrill
